

PTP/CLIENT ANTENNA

WiPanel PA M5-24X

WiPanel PA M5-24X is an innovative PTFE microstrip dual slant polarity (**MIMO 2x2**) planar antenna operating at the frequency range of 5,1 – 5,95 GHz with 24 dBi gain in both polarizations. It is desired for Point-to-Point, bridge and Point-to-Multipoint connections as a client antenna where the high-gained antennas are required. The reduced side-lobes level makes a gain more focused into the front direction than the standard antennas. Front shield of **WiPanel PA M5-24X** is made from the durable plastic material resistant against the UV radiation and bad weather conditions. The special reinforced **WiMount** bracket, made from fiberglass ensures the stability even in case of the strong wind. It comes with No. 2 of N Female connector.
