

HIGH-DENSITY DUAL BAND BASE SECTOR ANTENNA

WiBOX SA MDBC245-30-12HV

WiBOX SA MDBC245-30-12HV is concurrent dual band (DBC) (2,4 and 5 GHz) H&V polarity MIMO 2x2 panel antenna. It can operate at **two frequencies simultaneously**, at 2.4 GHz and at 5 GHz. According to medium gain, it can be used on short and medium distances, for example for **hotspots in schools, stadiums, offices or some public places.** Can work also with **mobile devices.** It can work **indoor and outdoor (IP67)** as well. Wide frequency band (2.4-2.5 GHz & 5.1-5.9 GHz) allows to easily find suitable frequency for the operation. The antenna comes with No. 2 RP SMA plug connectors (it could be also with RP TNC plug, MMCX, u.FL or Nf outside connectors), and it's designed for work in **concurrent dual band technology**, which means that **SA MDBC245-30-12HV radiates simultaneously at both operating frequencies using only one single connector for 2.4 and 5 GHz signals.** It's predicted mainly for special access points working in the systems where **two bands "frequencies" are diplexed for one antenna connector**, from the companies as **Cisco, Aruba Networks, Huawei, Xirrus** and other. The antenna is integrated with the top quality **WiBOX Medium** box system.
