

HIGH-DENSITY DUAL BAND BASE SECTOR ANTENNA

WiBOX SA M6DBC245-65-9HVX

SA M6DBC245-65-9HVX is dual band concurrent (DBC) (2,4 and 5 GHz) slant (+/-45deg) and H&V polarity MIMO 6x6 panel antenna. It can operate at two frequencies simultaneously, at 2.4 GHz and at 5 GHz. According to medium gain, it can be used on short and medium distances, for example for hotspots in schools, stadiums, offices or some public places. Can work also with mobile devices. It can work indoor and outdoor (IP67) as well. Wide frequency band (2.4-2.5 GHz & 4.9-6.0 GHz) allows to easily find suitable frequency for the operation. The antenna comes with No. 6 RP SMA plug connectors (it could be also with RP TNC, MMCX or u.FL connectors), and it's designed for work in concurrent dual band technology, which means that **SA M6DBC245-65-9HVX** radiates simultaneously at both operating frequencies using **only one single connector for 2.4 and 5 GHz signal**. It's predicted for special high-density Access Points working in the systems where two bands (frequencies) are diplexed in one antenna connector, from the companies as Cisco, Aruba Networks, Huawei, Xirrus and others. The antenna is integrated with the top quality **WiBOX Medium** box system.
