WiBOX

PA MMB0727-8X NF

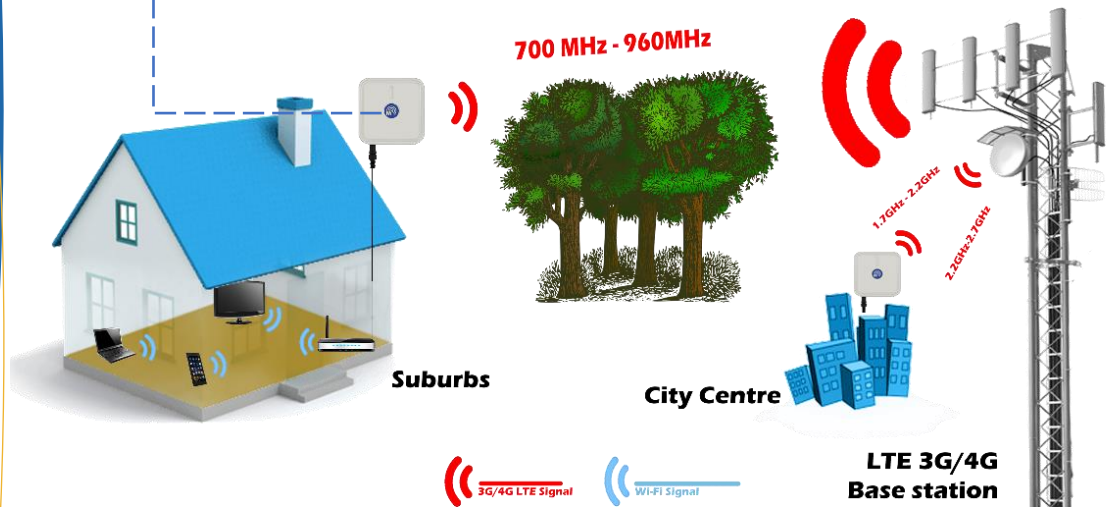

Universal LTE Antenna

LTE signal is lost!

ON THE SUBURBS AND RURAL AREAS THE CUSTOMERS ARE SUFFERING WITH WEAK SIGNAL. THERE ARE GAPS WHERE IS NO SIGNAL. THIS SITUATION MIGHT BE PRESENT ALSO IN CITY CENTRES.

On the suburbs and rural areas the customers are suffering with weak signal. There are gaps where is no signal. This situation might be present also in city centres.

Mobile operators use different frequencies to provide LTE signals like LTE700, LTE800, LTE1800 or LTE2600. In the city centres there are mainly LTE1800 and LTE2600 while on suburbs or rural areas there are the lower frequencies like LTE700/800..

WiBOX
PA MMB0727-8X NF

WiBOX PA MMB0727-8X NF

band 20
791-862MHz

band 3
1.7-1.9 GHz

band 7
2.5-2.7GHz

provides with the full coverage and directional characteristic of the antenna.

directional

The antenna should be headed to the base station.

WiMount

The standard bracket for WiBOX series is made from very solid material with high content of fiberglass, which makes it much more durable than standard steel bracket or magnesium cast (it is susceptible for cracking).

Universal solutions for your LTE Internet.

USING OF **WiBOX PA MMB0727-8X NF** ANTENNA WILL IMPROVE YOUR SIGNAL AND WILL MATCH TO ALL AVAILABLE FREQUENCIES.

EASTHETIC AND ERGONOMICS.

OUTDOOR ANTENNA IS THE WAY.

The true solution for the problem of weak LTE Internet is the outdoor antenna which provides the coverage of the all mentioned frequencies and provides the suitable radiation characteristic to improve the signal and the Internet.

Very important thing which Wireless Instruments force is the easthetic and ergonomics aspect of the system and installation. We provide the customer with highest-quality product resistant against the UV and bad weather conditions, ensuring stable work during the operation time. The mounting kit made from the fiberglass ensures the highest reliability and You can be sure it won't get rust..
